April 8, 2016

Dear Sisters and Brothers,

The Utility Workers Union of America (UWUA) does much for working families; however, there is still much left to do – including lending our support to outside charitable causes.

While America's union movement mobilizes around a change agenda in 2016, we must also work with community partners to address the root causes of social and economic inequality in our communities. Far too many families are struggling to make ends meet.

United Way is a long-time partner of UWUA, helping such working families.

For years, this partnership has truly made a difference. Our Union is not only helping those who need it through the United Way, but our organizations share a goal of long-term solutions to social service needs through community engagement.

On behalf of the Utility Workers Union of America, we proudly endorse the “**2016 United Way Campaign**” and urge you to support this important effort.

Together, we can make real investments in our communities, our country and our future. Thank you.

In Solidarity,

D. Michael Langford
National President
